**BREAKING NEWS: SECRET CHINESE-NORTH KOREAN DEAL. GIANT RABBITS PROMISED. NO SIGN OF BURGER KING. GRAND CHAIRMAN ZOMBIE KIM JONG-IL SHOT INTO SPACE BY UNITED COUNTRIES**

The nations of the world stood as one today, united in their efforts to oppose the Zombie menace on earth. The threat posed by a Zombie led North Korea was enough to united the nations of the world, and even the Korean people themselves, in an effort to oppose such a body. The Korean missile, originally slated to put a satellite into space on the hundredth anniversary of Kim Il -Sung birth, was tasked to dispose of the unholy influence of the zombie menace. In an agreement between China and North Korea, the North Koreans agreed to move their space program to China and to use their single rocket to send their dear leader into space, where he truly will become the eternal president. In exchange, the North Koreans will receive 25% more food aid and 10,000 giant colored rabbits. Hopefully the world will be safe from the Zombie menace, for now.

**MUMBAI BOMB TRACED TO RUSSIAN LAB, CHECHEN BOMBERS**

DESPITE SIGNIFICANT official protest over the sudden arrest of their chief sales representative at the last plenary session, the ERL has rendered their judgment on the traces of radiological material found after the dirty bomb attack in Mumbai. In cooperation with Interpol, laboratory technicians traced the material used in the device, Caesium-137, to a Russian medical facility which had recently been attacked and raided by Chechen militants. International authorities speculate that the Chechens had intended to provoke an India-Pakistan crisis in order to distract Russian attention from the Chechen struggle and set the stage for a major play for Chechen independence.

### ERL SALESMAN ARRESTED, RELEASED, RE-ARRESTED, FOUND TO BE DISGUISED INTERNATIONAL FUGITIVE

IN A SHOCKING turn of events at the last plenary session, delegates from the United States and Israel concluded what they described as a 'sting operation' with the public citizen's arrest of the ERL's head sales representative at the conference, accusing him of trafficking in weapons of mass destruction. The representative was taken into custody by officials, who initially found no grounds on which to charge the man and released him on his own recognizance. Upon consultation with Interpol, however, the representative was re-arrested after he was found to actually have been Tajik-Russian arms dealer Viktor Bout, a former Russian military intelligence officer turned so-called "Merchant of Death" who has been involved in arms trafficking in nearly every area of the world over the last twenty years and is believed to have inspired in part Nicholas Cage's character Yuri Orlov in the 2005 film *Lord of War*. Bout's appearance at this conference, in the guise of a representative of the Engineering Research Laboratories, is especially surprising because he had recently been sentenced to twenty-five years in federal prison by a court in New York City. His attempts to buy and sell nuclear arms and missile systems at this conference represent a step to the next level for Bout, and his rapid escape from police custody has puzzled outside observers. He has been taken into custody once more by Interpol representatives and will be transported back to prison to continue serving his sentence. The United States and Israel have alleged that during the conference Bout offered to provide Israel with a nuclear weapon. Bout denies the charges,

and his true activities are as yet unknown.

## GRAND CHAIRMAN OF CONFERENCE CAUGHT WITH ALUMINUM TUBES & PINEAPPLE IN OFFICE:

The Truthiness Express has received an insider report that the Grand Chairman Dr. Alex Montgomery has been hiding aluminum tubes that are used for uranium enrichment in his office. Montgomery claims that the aluminum tubes were a "gift" from students at Reed College. Given the fact that there is a nuclear reactor on Reed College's campus, Montgomery's possession of aluminum tubes is very suspicious. It seems like this whole conference is just a scam.

## DPRK INCORPORATES WESTERN CAPITALIST FICTION INTO MASS GAMES

Hunger Games had an explosive start in the United States, and it has quickly spread around the world. Apparently, the North Koreans, in an effort to understand popular American conceptions of governance, have adopted their own, real-life version of these originally fictional accounts. The delegation was spotted in a remote movie theater in New York City, buying tickets for a ghastly-looking Kim Jung Il. Sources report that the North Koreans will build large stadiums to carry out the games within the next couple of months, and furthermore, will draft children ages 12 to 18. Speculations as to the fate of the survivors are varied. We, here at the Truthiness Express, endorse the idea that the survivors will then become part of an elite team of warriors who will respond directly to Kim Jung Il. Will the freedom-loving world let this stand?
