---

To all the Delegations present at this Diplomatic Conference, with the exception of the Zionist Entity, which we, and all other responsible entities urge expelled from this meeting of equals,

Today represents the beginning of a new path to peace, a new era in safe nuclear energy around the world.

Before we proceed, let us remind you all: The proud Islamic Republic of Iran is a nuclear state. Our peaceful program has reached enrichment rates of 20 percent and although we naturally have the capability to enrich our uranium stores to over 80%, we have not done so. Iran has an extensive peaceful nuclear program, and by 2025 we intend to produce 23,000 MWh of peaceful, clean nuclear energy per year.

Iran has not violated the Nonproliferation Treaty, and will continue to remain in compliance despite Western allegations. Iran's failure to report a small, peaceful nuclear energy program involving uranium enrichment was in fact a minor technical oversight that has been corrected. Heed, delegations--we do NOT have a nuclear weapons program, and we do NOT aspire to have one. We are a PEACEFUL nuclear state. All warmongering nations, most notably the Zionist Entity and their corrupt Western allies, are Backwards and Infantile in their pursuit of nuclear weapons.

Esteemed delegates, let not the imperialist powers sway you from the path of truth. The International Atomic Energy Agency, the world's central intergovernmental forum for scientific and technical co-operation in the nuclear field, should not be mistaken for a unbiased entity. The organization is unbalanced and unprofessional, and caters to the interests of the Great Satan. Their evidence against the Great Nation of Iran is unfounded. Furthermore, delegates, the great state of Iran has been wrongly subjected to a Backwards, Imperialist interpretation of the Nonproliferation Treaty. The United States has not kept up its side of the Nonproliferation Treaty. The United States now threatens all peace loving states, including several members of this conference. The United States has not acted in good faith with regards to its nuclear program and still imposes a disgusting double standard on non Western entities.

Military threats from the United States are tantamount to playing with fire and all states have a right to defend themselves utilising any means necessary. The United States' brutal imperialist policy in the Persian Gulf, and its institution of puppet regimes in the Middle East CLEARLY DEMONSTRATES the CORRUPT and IMPERIALIST nature of The Great Satan.

To produce nuclear materials for peaceful purposes is our sovereign right, and we will strive to sustain this right in the face of Western imperialism.

The United States does not stand alone, however. It is only the leader of the powerful, imperialist forces that violently encroach upon the sovereignty of other states. One of their closest and most volatile allies in this imperialist crusade is the Zionist Entity, a false nation which the Iran stresses MUST be removed from this conference, to be replaced by the rightful state of Palestine.

Delegates. I will leave you with this. The Zionist entity will one day disappear from the face of the Earth (Inshallah). The state of Iran is strong, and only becoming stronger. In the coming years, Iran will allow a thousand peaceful nuclear flowers to bloom. The great nation of Iran is on the right side of history. The Western Imperialists are not. Thank you.
