
Computer Science is hard sometimes, it's ok to ask for help!

How to Get Support with CS

Drop-In Tutoring

Drop-in tutoring happens every weekday evening, **Sun-Thurs from 7-9pm in ETC 208 (Where 121/221 labs are held)**. Come by anytime during tutoring hours (even if you don't have a question) to work on assignments around other CS students and get moral support from the community.

Individual/Small Group Tutoring

Every Reed student is entitled to one hour per week of individual tutoring (or more with an accommodation) for every course, and you also have the option to pool tutoring hours with other students in the class to do multiple hours of small-group tutoring. Tutoring appointments can be made at <https://iris.reed.edu/tutor/tutors/profiles> for any time and place that works for you and your tutor. Please remember that tutors are busy Reed students too, and really appreciate it when you try to schedule appointments at least a few days in advance when possible :)

Professor's Office Hours

Mark's Office Hours are in **Library 314 on Tuesday 4:45-6pm, Wednesday 10-11am, and Thurs 10-11:30am**. Eric's Office Hours are in **Library 316 on Tuesday 9am-12pm and Friday 11am-1pm**.

STEMGeMs Office Hours

Reed's group for gender minorities in STEM hosts offices hours on **Mondays 4-5pm in Library 387 (Polytopia), Tuesday 1-2pm in Physics 134, and Friday 2-4 in the Chem Lounge**.

DOJO Study Skills Workshops and Coaching

Reed offers a variety of workshops as well as individual coaching to help you learn study skills, time management, etc. Find info at https://www.reed.edu/academic_support/index.html

Polytopia and The Math Lounge

Polytopia (Library 387) and the **Math Lounge (Library)** are academic spaces for students in CS (and math) classes. These spaces are often populated with other students working on similar coursework (and sometimes upperclassfolk who can answer your questions), and these rooms are conveniently on the same hallway as all the CS Professor's offices.
