MATH 113: DISCRETE STRUCTURES
EXAM 1 REVISIONS

You can regain full credit for up to two problems from Exam 2 in the following manner: For one problem, you may submit a revised solution. For another problem, you can undertake the following process:

(a) Identify the mistake you made on the problem.
(b) Identify the important concepts examined or used in the problem.
(c) Find or create a question of similar difficulty which engages with the same concepts; clearly state this question.
(d) Solve your question.
(e) Turn in parts (a)-(d).

Both parts of the revision stapled to your graded exam are due by the start of class on Wednesday, 26 February. You are welcome to consult with the instructor and textbooks during the revision process, but not with other students or tutors. For the second "metacognitive"revision, **you may not select a question if you have accessed its solution (in print, on the Internet, or in some other form).** Cite any sources used.
