

Review for Exam 1

Our first exam covers all of the material in Chapter 1 of our text and in Days 1–8 in our Course Log. As it says in our syllabus: “You may reference one two-sided US Letter or A4-size page of notes during each exam. Calculators, computers, phones, collaboration, books, and the Internet are prohibited during exams.”

You are welcome to email me or post on the Moodle forum if questions arise during your studying.

To study for the exam, do the following:

- (1) Try to create a brief summary of our (very chatty) text for yourself—extract the main ideas.
- (2) **Most importantly:** Read through our Course Log for Days 1–8. Make sure you understand the solutions to all of the problems. The solutions appear *at the end* of the Course Log as it is now posted on our course homepage:

<https://people.reed.edu/~ormsbyk/113/math113.pdf>

- (3) Review the homework assignments.
- (4) Go through Chapter 1 and the Course Log, Days 1–8, and create your reference sheet.
- (5) Relax.
