Course Description and Goals

Full course for one semester. This course is an advanced seminar for juniors and seniors with sufficient background in international relations and/or foreign policy. It grounds a survey of multi-method approaches to conducting research in international and comparative policy studies in substantive contemporary interdisciplinary topics. The course will be particularly useful both for students who will be writing their junior qualifying examination in ICPS or related fields and for students who are in the first semester of their thesis research. Prerequisites: junior standing and Political Science 240 or History 370. Conference.

Nuclearity

This course investigates the origins and effects of the spread of nuclear weapons and related weapons of mass destruction at international and domestic levels through interdisciplinary and multi-method approaches. It begins with a discussion of reflexivity and interdisciplinarity and science and technology studies. It then looks at the past and future of nuclear weapons crises through the lenses of process tracing and counterfactuals. This dialogue between present and past continues, first looking at the failure of two modern bomb projects in comparison with the first successful project through the lenses of case study methods and feminism. The course continues with network analysis of proliferation, unpacking individual leaders' psychological propensities through content analysis, and exploring how international discourses about nuclear weapons have structured international order. It ends with ethnographic approaches to nuclear weapons labs and open-source intelligence approaches to uncovering nuclear programs. Cross-listed as Political Science 345.

The course focuses on the tools and techniques of interdisciplinary research across the social sciences and history. Much of the work in the class will involve reading, analyzing, and critiquing existing research with an eye to identifying the questions asked, methodology chosen, and how answers were reached.

Requirements

Class Participation

Students are required to actively participate in the class; they will have the opportunity to do so both during and outside of classroom hours. Good participation involves—among other things—listening carefully to others, referring or responding to the previous speaker's comments, and asking questions in addition to or instead of making statements. There *is* such a thing as bad participation. This includes—but is not limited to—interrupting others, dominating conversations, and conducting ad hominem attacks.

Class will occasionally start with an interruptible mini-lecture on my part; after we've covered the basics of the methodological approaches of the day and how they relate to each other will we move to discussion of the texts. I do this to ensure that you understood the basic assumptions, mechanisms, and implications of each approach, and will consequently often contain a Socratic component. This is also a good time to ask one of your questions! I will use your weekly Moodle memos (see below) to get a sense of where you are stuck or what you are interested in and incorporate that into the mini lecture and/or discussion part. Sometimes we will not get to all of the readings or very far in the discussion. This is deliberate; you will still benefit from the context provided by those pieces even if we don't discuss them. If we miss something in class, you are most welcome to post (or re-post) your question/observation to Moodle after the class.

If you miss a day of class for any reason whatsoever, you may make it up by posting a summary of each of the readings for that day to Moodle. In order to make up missed days from the first half of the semester, these must be posted before the first

day of classes after the break; from the second half, by the end of reading period. If you are sick, do NOT come to class and spread it to the rest of us. Instead, stay home, write your summaries up (which all of you should be doing every day in any case), and get better.

Readings for the course are drawn from one edited volume, eight additional books, and E-Readings that can be downloaded directly from the links on Moodle. These are best used in conjunction with Zotero, which is supported by the library. I encourage all students to use Zotero to download the class readings, take notes, and use for citing works in their papers. Students are expected to bring a copy of the readings to class every day for reference. Laptops are not permitted in class; tablet or convertible devices may be used without keyboards for accessing the readings. Take notes by hand; this will help you remember the subject materials. Readings marked "Further" on the syllabus are other relevant articles or books; they are not required for class. Students who have a particular interest in the topics in question are encouraged to read these pieces and to incorporate them into their assignments.

Required, multi-day

• Audie Klotz and Deepa Prakash, editors (2009) *Qualitative Methods in International Relations: A Pluralist Guide*. Basingstoke: Palgrave Macmillan, ISBN 9780230241756

Required, single-day

- Week 4: Graham Allison (1971) Essence of decision; explaining the Cuban missile crisis. Boston, MA: Little Brown, 277, ISBN 0682477044
- Week 5: Jeffrey G. Lewis (2018) *The 2020 Commission Report on the North Korean Nuclear Attacks against the United States: A Speculative Novel*. Boston: Mariner Books, 270, ISBN 978–1–328–57391–9
- Week 6: Målfrid Braut-Hegghammer (2016) Unclear Physics: Why Iraq and Libya Failed to Build Nuclear Weapons. 1st edition. Ithaca: Cornell University Press https://ebookcentral.proquest.com/lib/reed/detail.action?docID=4673101, 230, ISBN 978-1-5017-0278-5
- Week 7: Denise Kiernan (2014) *The Girls of Atomic City: The Untold Story of the Women who Helped Win World War II.* Touchstone Books, 315, ISBN 9781451617535
- Week 10: Jacques E. C. Hymans (2006) *The Psychology of Nuclear Proliferation: Identity, Emotions, and Foreign Policy*. Cambridge, UK: Cambridge University Press, 228, ISBN 0521850762
- Week 11: Richard M. Price (1997) *The chemical weapons taboo*. Ithaca, NY: Cornell University Press, 176, ISBN 0801433061
- Week 12: Shampa Biswas (2014) *Nuclear Desire: Power and the Postcolonial Nuclear Order*. Minneapolis, MN: University of Minnesota Press https://ebookcentral.proquest.com/lib/reed/detail.action?docID=1793914, 199, ISBN 978-1-322-15419-0
- Week 14: Hugh Gusterson (1996) Nuclear Rites. University of California Press, 250, ISBN 0520213734

Course Website

Frequent use of the course website will be necessary for success in the class. Supplemental and core readings will be made available there; and assignments will be turned in electronically using the site.

Assignments

Memos will be due weekly on Mondays at noon. These memos are short (250-500 words), as they are designed to make you think about applying concepts and tools to your own research and that week's texts rather than your ability to generate mass quantities of text.

Assignments will reflect the structure of the POL/ICPS junior qual, although two assignments will be due the Friday before the official qual deadline so that you can separate out these assignments from your weekly readings and responses in this course. These are:

- Week 2 Friday, Sep 7: Short Proposal for your Research Design
- Week 11 Friday, Nov 9: Draft Research Design
- Week 16 Monday, Dec 10: Final Research Design

Citation and Plagiarism

A major goal of this course is to encourage good reading, research, and citation habits. Good research requires good documentation of sources and the ability to put one's own analysis and thoughts into a paper rather than relying on others. When in doubt as to whether you should cite something, always do it. Citations are required for ideas as well as facts, and are imperative even if you are not directly quoting authors. Make sure that you provide as specific a citation as possible; if an author discusses an idea in one section or one page, cite the specific section or page instead of the full article or book. I usually recommend that students use in-text author-date citation with full Chicago Manual of Style citations; see their Citation Quick Guide: http://www.chicagomanualofstyle.org/tools_citationguide.html>.

However, style is less important than the cites being present. If you use an idea or a fact without attribution, you are plagiarizing someone else's work. Plagiarism and cheating are violations of academic integrity and thus violations of Reed's Honor Principle. As specified by Reed's academic conduct policy, such violations will result in disciplinary actions, including suspension or permanent dismissal from the College. Plagiarism is submitting a piece of work which in part or in whole is not entirely the student's own work without attributing those same portions to their correct source. For examples of plagiarism and how to avoid it, see http://www.csub.edu/ssric-trd/howto/plagiarism.htm. If nothing else, you should avoid "sinister buttocks" syndrome. For more information on Reed's policies see: http://www.reed.edu/academic/gbook/comm_pol/acad_conduct.html.

Plagiarism often comes as the result of a student being up against a deadline without being able to meet it. If you are having trouble meeting a deadline for whatever reason, please contact me. It is always better to ask for more time than to plagiarize. When you ask for an extension, you should a)explain what events are causing you to miss the deadline and b)request an amount of time proportional to the interfering events. You may ask for an extension up to, but not exceeding, the amount of time remaining for the assignment, except for cases of emergencies. However, since this course runs on a strict timetable and your fellow students are counting on you, in many cases extensions cannot be granted.

Accommodations

If you'd like to request academic accommodations due to a disability, please contact Disability Support Services. If you have a letter from Student Services, please let me know so we can discuss those accommodations.
