

11/7: Modeling Accumulations

The purpose of calculus is twofold:

1. to find how something is changing, given what it's doing;
2. to find what something is doing, given how it's changing.

We did (1) geometrically and algebraically. We did (2) algebraically. Let's do (2) geometrically!

If you travel at 2 mph for 4 hours, how far have you gone?

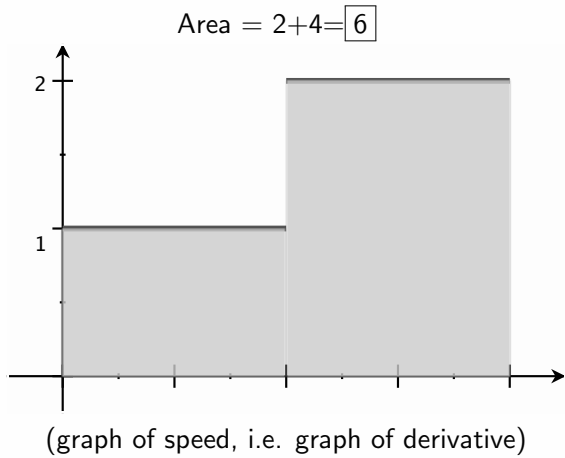

Answer: 8 miles.

Another way: Area =

(graph of speed, i.e. graph of derivative)

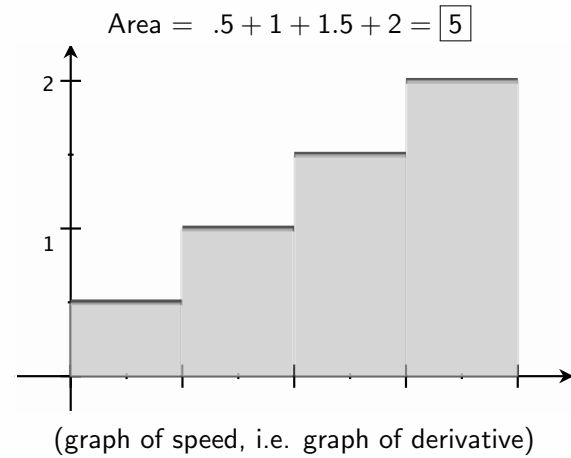

If you travel at 1 mph for 2 hours, and 2 mph for 2 hours, how far have you gone?

If you travel at

.5 mph for 1 hour,
1 mph for 1 hour,
1.5 mph for 1 hour,
2 mph for 1 hour,

how far have you gone?

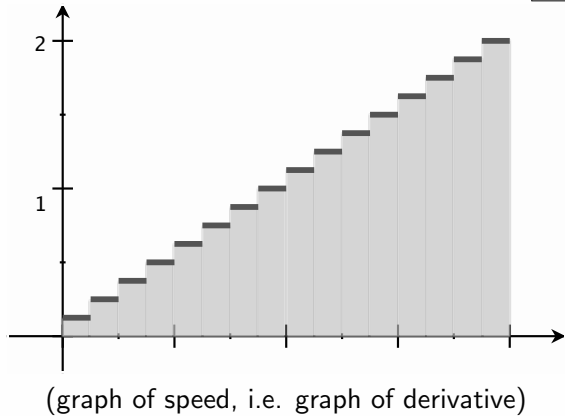

If you travel at

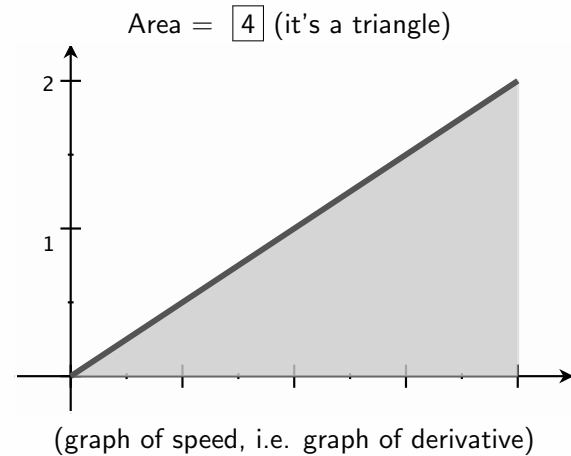

.175 mph for 1/4 hour,
.25 mph for 1/4 hour,
...
2 mph for 1/4 hour,

how far have you gone?

Area = $.175 * .25 + .25 * .25 + \dots + 2 * .25 = 4.25$

If you travel at $\frac{1}{2}t$ mph for 2 hours, how far have you gone?

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

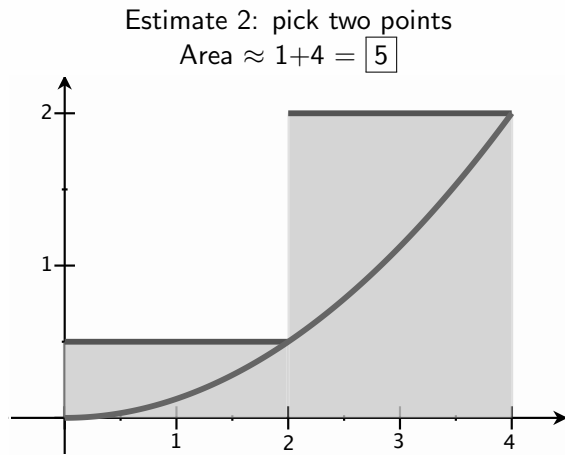

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

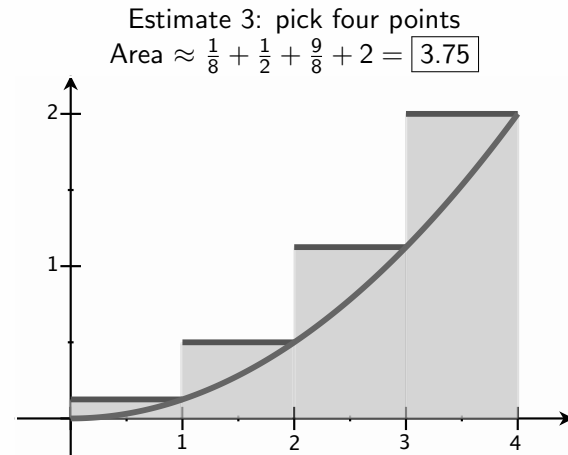

Estimate 1: pick the highest point
Area ≈ 8

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

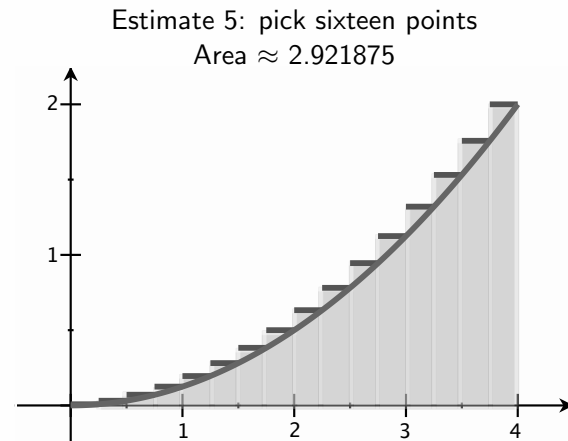

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

Estimate the area under the curve
 $y = \frac{1}{8}x^2$ between $x = 0$ and $x = 4$:

Estimating the Area of a Circle with $r = 1$

Divide it up into rectangles:

Estimating the Area of a Circle with $r = 1$

Divide it up into rectangles:

Estimate area of the half circle ($f(x) = \sqrt{1 - x^2}$) and mult. by 2.

# rect.	Area
4	$2 * 1 = 2$
$4 * 2$	
$4 * 3$	
$4 * 4$	
$4 * 5$	

The Method of Accumulations

Big idea: Estimating, and then taking a limit.

Let the number of pieces go to ∞
i.e. let the base of the rectangle for to 0.

This not only gives us a way to calculate, but gives us a proper definition of what we mean by area!

Also good for volumes and lengths...

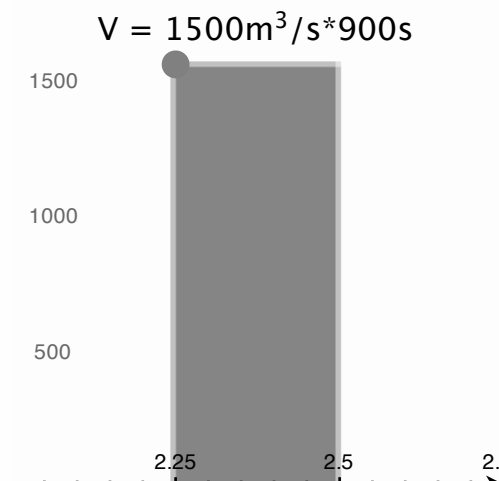

A small dam breaks on a river. The average flow out of the stream is given by the following:

hours	m^3/s	hours	m^3/s	hours	m^3/s
0	150	4.25	1460	8.25	423
0.25	230	4.5	1350	8.5	390
0.5	310	4.75	1270	8.75	365
0.75	430	5	1150	9	325
1	550	5.25	1030	9.25	300
1.25	750	5.5	950	9.5	280
1.5	950	5.75	892	9.75	260
1.75	1150	6	837	10	233
2	1350	6.25	770	10.25	220
2.25	1550	6.5	725	10.5	199
2.5	1700	6.75	658	10.75	188
2.75	1745	7	610	11	180
3	1750	7.25	579	11.25	175
3.25	1740	7.5	535	11.5	168
3.5	1700	7.75	500	11.75	155
3.75	1630	8	460	12	150
4	1550				

A small dam breaks on a river. The average flow out of the stream is given by the following:

Over each time interval, we estimate the volume of water by
Average rate \times 900 s

Over each time interval, we estimate the volume of water by
 $\text{Average rate} \times 900 \text{ s}$

Over each time interval, we estimate the volume of water by
 $\text{Average rate} \times 900 \text{ s}$

hours	m^3	hours	m^3	hours	m^3
0	135000	4.25	1314000	8.25	380700
0.25	207000	4.5	1215000	8.5	351000
0.5	279000	4.75	1143000	8.75	328500
0.75	387000	5	1035000	9	292500

3.75	1467000	8	414000	12	135000
4	1395000			total=33,319,800	

A tent is raised and has height given by xy over the 2×2 grid where $0 < x < 2$ and $0 < y < 2$. What is the volume of the tent?

A tent is raised and has height given by xy over the 2×2 grid where $0 < x < 2$ and $0 < y < 2$. What is the volume of the tent?

Estimate via boxes!

Volume = base * height.

x	y	height = xy	volume
0	0	0	$0 * 1$
0	1	0	$0 * 1$
1	0	0	$0 * 1$
1	1	1	$1 * 1$

total volume ≈ 1

A tent is raised and has height given by xy over the 2×2 grid where $0 < x < 2$ and $0 < y < 2$. What is the volume of the tent?

Estimate via boxes!

Volume = base * height.

x	y	height = xy	volume
1	1	1	$1 * 1$
1	2	2	$2 * 1$
2	1	2	$2 * 1$
2	2	4	$4 * 1$

total volume ≈ 9

A tent is raised and has height given by xy over the 2×2 grid where $0 < x < 2$ and $0 < y < 2$. What is the volume of the tent?

Estimate via boxes!

Volume = base * height.

x	y	height = xy	volume
.5	.5	.25	$.5 * 1$
.5	1.5	.75	$.75 * 1$
1.5	.5	.75	$.75 * 1$
1.5	1.5	2.25	$2.25 * 1$

total volume ≈ 4.25
